

## LAnthropologie (2)

Filesize: 9.67 MB

### ***Reviews***

*This publication is great. It is full of wisdom and knowledge You will not really feel monotony at at any time of the time (that's what catalogs are for relating to when you ask me).*

*(Dr. Everett Dicki DDS)*

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 54 pages. Original publisher: Washington, DC : Office of Nuclear Regulatory Research, U. S. Nuclear Regulatory Commission, 2009 OCLC Number: (OCoLC)568687036 Subject: Nuclear reactors -- Safety measures. Excerpt: . . . 1 Introduction The Karlsruhe Research Center ( FZK ) is involved in the overall qualification of computational tools for the safety evaluation of nuclear power plants of different design to improve their prediction capability and acceptability. In this framework, the code RELAP5 PANBOX was qualified within the Organization for Economic Cooperation and Development Nuclear Energy Agency ( OECD NEA ) pressurized-water reactor ( PWR ) main steam line break ( MSLB )-benchmark San00 . As continuation of this work, partly as a contribution to the international Code Assessment and Maintenance Program ( CAMP ) of the U. S. Nuclear Regulatory Commission ( NRC ), the coupled code system RELAP5 PARCS is being validated. The PARCS capabilities for quadratic fuel assembly geometry have been qualified in the frame of both the PWR TMI-1 main steam line break ( MSLB ) Kozl00 and the boiling-water reactor ( BWR ) Peach Bottom Turbine Trip ( PBTT ) Bous04 benchmarks. FZK is especially interested in the new PARCS capability Joo02 for hexagonal geometries. These aspects are important not only for the VVER-type light-water reactor ( LWR ) but also for innovative reactor concepts. The international OECD NEA VVER-1000 Coolant Transient Benchmark Phase 1 is an excellent opportunity to validate the overall simulation capability of RELAP5 PARCS regarding both the thermal-hydraulic plant response ( RELAP5 ) using measured plant data and the neutron physics models ( PARCS ). The Phase 1 of this benchmark is devoted to the analysis of the pump restart test while the other three pumps are in operation...
