

Mathematical Modeling in Economics, Ecology and the Environment (2nd ed. 2013)

Filesize: 8.62 MB

Reviews

These types of book is the greatest ebook readily available. I was able to comprehend every little thing using this published e pdf. I realized this pdf from my dad and i encouraged this publication to discover.

(Dr. Porter Mitchell)

MATHEMATICAL MODELING IN ECONOMICS, ECOLOGY AND THE ENVIRONMENT (2ND ED. 2013)

To download **Mathematical Modeling in Economics, Ecology and the Environment (2nd ed. 2013)** eBook, remember to follow the web link below and download the file or gain access to other information which are have conjunction with MATHEMATICAL MODELING IN ECONOMICS, ECOLOGY AND THE ENVIRONMENT (2ND ED. 2013) ebook.

Springer-Verlag New York Inc. Hardback. Book Condition: new. BRAND NEW, Mathematical Modeling in Economics, Ecology and the Environment (2nd ed. 2013), Natali Hritonenko, Yuri Yatsenko, Updated to textbook form by popular demand, this second edition discusses diverse mathematical models used in economics, ecology, and the environmental sciences with emphasis on control and optimization. It is intended for graduate and upper-undergraduate course use, however, applied mathematicians, industry practitioners, and a vast number of interdisciplinary academics will find the presentation highly useful. Core topics of this text are: * Economic growth and technological development * Population dynamics and human impact on the environment * Resource extraction and scarcity * Air and water contamination * Rational management of the economy and environment * Climate change and global dynamics The step-by-step approach taken is problem-based and easy to follow. The authors aptly demonstrate that the same models may be used to describe different economic and environmental processes and that similar investigation techniques are applicable to analyze various models. Instructors will appreciate the substantial flexibility that this text allows while designing their own syllabus. Chapters are essentially self-contained and may be covered in full, in part, and in any order. Appropriate one- and two-semester courses include, but are not limited to, Applied Mathematical Modeling, Mathematical Methods in Economics and Environment, Models of Biological Systems, Applied Optimization Models, and Environmental Models. Prerequisites for the courses are Calculus and, preferably, Differential Equations.
