Pantheon. 1 Cloth(s), 2015. hard. Book Condition: New. A few million years ago, our ancestors began to stand upright, freeing our hands to create tools and our minds to ponder the world around us. Here the bestselling author of *The Drunkard's Walk* takes us on an inspiring tour through the history of human progress and the key events in the development of science by examining a few unconventional thinkers: Aristotle, Galileo, Newton, Lavoisier, Darwin, and Einstein. In the process, Leonard Mlodinow presents a fascinating new look at the unique characteristics of our species and our society that helped propel us from stone tools to written language, and through the birth of chemistry, biology, and modern physics."Mlodinow never fails to make science both accessible and entertaining."Stephen Hawking"An entrancing tale of scientific history. Mlodinow provides many cultural touchstones and tells personal stories, both poignant and amusing, about his experiences as a theoretical physicist to draw us even closer to the history."Washington Post 341.
