

Transactions of the Royal Institution of Naval Architects Volume 27

By Royal Institution of Architects

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 186 pages. Dimensions: 9.7in. x 7.4in. x 0.4in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1886 Excerpt: . . . in 1862 and which I described in my Paper of 1884. I worked that system all round with different pressures under the grate-bars, and as I have described, whenever I increased the combustion above natural draught rates the troubles increased in all directions. It is not a system fitted for a high combustion if economy and workability are desired-The manner of working described by Mr. Marshall, with thin fire-bars, as used by Mr. Ferrando, as I understand him, is a combination of the closed stokehold and the closed ashpit systems, one fan as mentioned, blowing into the ashpit of the boiler in which the experiments were tried, and the other fan into the closed stokehold built round the boiler, giving air and maintaining pressure above the bars. By this means, which is after the manner of my system in effect, I have no doubt a high...
